3. The following is an examiner's statement of reasons for allowance: In claims 18 and 24, the recitation of the cooling part including a cross sectional area that increases and then decreases going from an introducing part and to a draining part, in combination with the rest of the recited structure defines over the prior art. The most relevant reference of Mikubo et al. discloses the opposite of the cross sectional area decreasing and then increasing going from the introducing part to the draining part, as shown in figure 5.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
